

John Erick M. Bejucos

Computer Engineering Student

Motivated and adaptable Computer Engineering student with experience in embedded systems, technical problem-solving, and customer communication. Skilled in programming, IoT development, computer troubleshooting, and hardware integration. Seeking an internship opportunity to apply technical knowledge, contribute to innovative projects, and gain hands-on industry experience

Address

General Trias, Cavite Philippines

TECHNICAL SKILLS

- Python
- C++
- Java
- Embedded Systems & IoT Development
- Hardware & Software Troubleshooting
- Computer Setup & Configuration
- Cloud Computing
- AI Solution Application
- Basic Networking
- MySQL

SOFT SKILL

- Communication Skills
- Leadership
- Problem Solving
- Teamwork
- Adaptability
- Time Management

Character Reference

Available upon request.

Language

English

Tagalog

EDUCATION

2021 - 2026

Lyceum of the Philippines University - Cavite

Bachelor of Science Major in Computer Engineering

2017-2018

AMA Computer College

STEM - Senior High School

2011-2012

Sunny Brooke Elementary School

ENGINEERING PROJECTS

Water Monitoring System with Database Integration

- Developed a water monitoring system capable of collecting and storing sensor data in a centralized database.
- Integrated database functionality for real-time monitoring and data management.
- Implemented sensor-based monitoring to improve data accuracy and accessibility.
- Applied basic IoT and system integration concepts for efficient monitoring operations.

Open Source Retro Gaming System

- Built a retro gaming system using open-source software and hardware components.
- Configured emulators and optimized system performance for retro gaming applications.
- Performed software setup, troubleshooting, and hardware integration.
- Enhanced knowledge in Linux-based systems and embedded hardware configuration.

Autonomous ESP32 Robotic Vehicle

- Developed an autonomous robotic vehicle using the ESP32 microcontroller platform.
- Integrated motor drivers, sensors, and wireless communication modules.
- Implemented autonomous navigation and movement control functionalities.
- Applied embedded systems programming and hardware integration techniques.

WORK EXPERIENCE

Full-Time Missionary

The Church of Jesus Christ of Latter-day Saints

September 2019 - September 2021

- Developed leadership and communication skills.
- Provided community service and support.
- Worked effectively in team-based environments.

24-7 Intouch - BPO Call Center Agent

October 2021 - August 2022

- Assisted customers with inquiries and concerns.
- Developed strong communication and problem-solving skills.
- Worked efficiently in a fast-paced environment.
